

Inspiration

Emy has seen much action over the years, like a wise old warrior, she brings style and elegance to our Star Wars droid trio. Radio controlled, supplied with an operator, she appears to move independently at events, interacting with the public. Featuring rotating head, flashing lights, sounds and a functional periscope. Her latest upgrade added mirror decals, disco ball and of course a hand bag for dancing round... Introducing Disco Emy

Tech Spec

2 x 24v 120w electric motors 1 x 12v 100w head motor. 24v: 2 x 12v 25Ah batteries 24 to 12v converter 12v to 6v BEC. MDF body, steel subframe.

Extras

EMY The Disco Droid

Emy was the first full RC Droid we created. Having already made a number of static Star Wars R2D2 droids it was time to explore the other R series designs. Emy has evolved over the years, changing colour and style, her latest upgrade has been to become a Disco Diva. Her name was inspired by her build time. When a member of the American R2D2 builders group, found out that Emy was built in record time, he commented, "You should get an Emmy award for completing that droid so quickly" and thus Emy was named.
